(54) PHOTOELECTRIC TRANSDUCER AND PHOTOELECTRIC CELL

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a photoelectric transducer and a photoelectric cell using the same, which has excellent energy conversion efficiency and is especially excellent in durability and energy conversion efficiency.

SOLUTION: The photoelectric transducer includes a conductive support, a semiconductor fine particle layer sensitized with a pigment placed on the conductive support, and a charge transfer layer. An additional semiconductor layer is disposed between the semiconductor fine particle layer and the conductive support. Also, a molten salt electrolyte or an inorganic hole transfer material is used in the charge transfer layer.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
